

THE LOGO SYSTEM

A brand built from zellige geometry.

An eight-pointed *khatam* star — the cornerstone of Maghrebi tilework — abstracted into two interlocking squares, with a single terracotta keystone at its center: the moment of proof. Academic enough to trust, geometric enough to feel modern.

01 The monogram

A standalone icon mark. Two squares — one upright, one turned 45° — lock into an eight-pointed star; the terracotta diamond marks the center. It holds its silhouette from a billboard down to a 16-pixel favicon.

02 The combination mark

The primary lockup for the website header, app and decks. Mark and wordmark share a fixed optical gap, the star set at cap height of the type.

03 The wordmark

For tight, text-only contexts. Sora at 700, optically tightened. The acute on the *é* is redrawn as a single angled terracotta stroke — the brand's one warm note, carried inside the letterform.
